

Appln No. 10/694,118  
Amdt date May 16, 2006  
Reply to Office action of December 16, 2005

### **REMARKS/ARGUMENTS**

Claims 1-42 remain pending in this application. Applicant has amended claim 1. Applicant has also amended claims 2, 3, 5-19 and 23-42 to be consistent with the amendments to base claim 1. The amendments find full support in the original specification, claims and drawings. No new matter is presented. Accordingly, Applicant respectfully requests reconsideration and a timely indication of allowance.

In the Office action dated December 16, 2006, the Examiner rejected claims 1-18, 23-33 and 36-42 under 35 U.S.C. § 103(a) as allegedly obvious over Abele, et al. (U.S. Patent No. 5,403,311) in view of Mulier, et al. (U.S. Patent No. 6,016,809). However, Applicant has amended independent claim 1 to recite a needle electrode assembly comprising a proximal tubing and distal tubing, wherein the proximal tubing is more flexible than the distal tubing. Neither Abele nor Mulier teach or suggest such a feature. Accordingly, independent claim 1, and all claims dependent therefrom, including claims 2-28, 23-33 and 36-42, are allowable over Abele and Mulier.

The Examiner also rejected claims 19-22, 34 and 35 under 35 U.S.C. § 103(a) as allegedly obvious over Abele in view of Mulier and further in view of either Stevens, et al. (U.S. Patent No. 6,866,650) or Tu, et al. (U.S. Patent No. 6,033,402). However, neither Stevens nor Tu remedy the deficiencies of Abele and Mulier since neither reference discloses a needle electrode assembly comprising a proximal tubing and distal tubing, wherein the proximal tubing is more flexible than the distal tubing, as recited in independent claim 1. Therefore, independent claim 1, and all claims dependent therefrom, including claims 19-22, 34 and 35, are allowable over Abele, Mulier, Stevens and Tu.
